

-Makes Life Powerful

Power cuts have come to be a part and parcel of our daily lives. In fact most of us today have to plan our day-to-day activities, both personal and professional taking into account the power cuts. We all want the power to available for us at all the time. To make sure the availability of highest quality power supply for the longest duration in your homes and offices, we recommends the following power saving guidelines for the ***Power Nucleus innovative Sine Wave Inverters***.

1. Switch “Off” all unwanted loads and save your battery power. Like you can switch off the lights and Fans of the various rooms if you are not using them (general power saving issue.)
2. Use CFL kinds of efficient lamps instead of incandescent a bulb which consumes more power and gives poor quality of light.
3. Do you know, you can light **five CFL** kinds of lamps in place of one (1) incandescent lamp, with same consumption of power? That means you can light up five different rooms with no addition load on your inverters, this increases the power availability time almost 40% - 50%.
4. Using CFL lamps will cost initially but you save a lot of money and power even in four months duration.

If you are not watching you TV, not using you audio system, switch them “Off” completely rather than keeping it in remote controlled mode. (Especially when these are connected to the Inverter). It is true with computers/printers also.

Power Nucleus, Pure sine wave inverters uses highly innovative technology to achieve well regulated average and RMS voltage, peak voltage and stable output voltage frequency (50Hz) in a very efficient manner, which is exactly equal to your AC mains supply from the state electricity board. That is why pure sine wave inverters from Power Nucleus are most desirable because our pure sine wave technology ensures zero humming of lights and prevents overheating of fans in effect extending life of the equipment and overcome all problems created by the Square and modified square wave Inverter.

IMPORTANT NOTE

Power Nucleus reserves the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement. Power Nucleus's products are not authorized for the use as life support applications/devices or medical system without the written permission of the president of Power Nucleus Inc.
